

## Lap Band Details

### Lap Band Details

A Free Seminar on lap band surgery can include: An opportunity to speak with a qualified and certified lap band surgeon; an explanation of the lap band procedure and how it will assist the individual in their weight loss goals; an opportunity to meet a lap band patient; a question and answer session; along with cost and insurance options.

The Free Seminar is also a good opportunity to get the time to know the surgeons at the facility one may be having their lap band procedure done at. Getting to know the people who will work to assist an individual in losing weight is important as they will be heavily involved in the patient's pre and post-surgery care.
